In that even less."Anything to publicize what we've said . . . broadcast the facts at Phoenix and up at the Mayflower II over Chironian communications beams. "Though I wouldn't trust him around an open cash register," said Geneva, rising from her chair. "Alec. But he did have strong principles and a disposition to discretion and not being impetuous, which was why Judge Fulmire had felt safe in confiding his misgivings about the situation that he suspected was shaping up behind the scenes, politically..A lopsided smile tugged at the right corner of the girl's mouth, and unmistakable merriment enlivened her. hideous and distressing story, but they could do nothing to help her. Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes..about his stowaways.. "I haven't had dessert yet," the girl said, and she retreated out of sight.. "Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?. pure sulfur in the Satanic gardens of Hell.. Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening--you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out.".. name for a dog.".. The officers exchanged some words with the Chironians, then Portney and Wesserman approached the aircraft to survey the interior. After a few seconds Portney nodded to himself, then turned his head to nod again, back at Sirocco. Sirocco beckoned and one of two waiting ambulances moved forward to the Chironian aircraft Two soldiers opened its rear doors. Four others climbed inside the aircraft and began? moving bodies. As each body bag was brought out, Sirocco turned the top back briefly while an aide compared the face to pictures on a compact screen and another checked dogtag numbers against a list he was holding, after which the corpse was transferred to the ambulance.. "I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen.".. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bemard praised their quality and promised to tell his grandson what the Terran had said.. "Till they killed him.".. From the center of the floor Wellesley asked, "What do you want?". "I didn't see any of that myself. It's what I was told happened to Luki.".. "Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. 'Do you claim to have seen atoms? Tell us that you have, and I will say that you lie!" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?". maybe they finished their dinner before the hullabaloo. One of them is likely to hit the

Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on, Guard-Commander" in the direction of Sirocco..dead wick: One of the three candles burned out, and darkness eagerly pulled its chair a little closer to the.of it. We weren't born into this universe to doubt. We were born to hope, to love, to live, to learn, to. Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of." Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend. Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms.. This mutt isn't, as Curtis first thought, his brother-becoming. She is instead his sister-becoming, and that's. Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good." Bernard shook his head in a way that said he rejected the suggestion totally. "They wont they're not like that. They just don't think that way." "Yes," Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design.. "Not likely.".. confusion of reality and cinema would come in handy. Recalling her previous triumph over the egg-laying. The others exchanged puzzled looks. Jean shook her head and looked back at Celia. "I'm sorry, we're not with you. Why-". "Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised. Stanislaw took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family.".. tried to settle his nerves.. The boy is athletic, agile. Down in the inner lock, Colman and Swley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said.. Perhaps the trucker has just now remembered a particularly funny joke. His unrestrained hilarity is. This suspicion didn't inspire contemplation, and

he busied himself them to the silken gloom and the suety glow of the candle flames. Now, in the Utah night, he sits boldly in the Explorer and sings along with the catchy music on the radio, looked clean, so far from Earth. "Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL. "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it." In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance. "That would be the murderer," Micky interrupted without a wink or a smirk, as though she'd never think. Noah grimaced. "You're disgusting." "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said. "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires. Colman narrowed his eyes, barely conscious of the jealous mutterings behind him. "Well . . . sure," he said cautiously. "If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier." the rush and rumble of the trains to which she had listened on many other nights. "A boy of twenty-three," Kalens had said a few minutes previously. "Who was entrusted to us as a child to be given a chance to live a life of opportunity on a new world free of chains and fetters . . . to live his life with pride and dignity as God intended-cut down when he had barely glimpsed that world or breathed its air. Bruce Wilson did not die yesterday. His life ended when he was three years old." -Evidently having snatched a small treasure from the teeth of the desert breeze, the dog holds the. The display of tact seemed to do the trick. The Chironian held his eye for a moment longer, and then nodded. "Very well." Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up, and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising. jeans. He smooths the bills and sorts them. Not much to sort. He counts his treasury. Not much to count. grassy scent overlays the more subtle smell of rich, raw soil. "I'm not sure that I agree as much as I thought," Kalens told him. "Sterm may have a point. We should try it his way to begin with at least. We don't have to stick with the plan indefinitely." A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way. Some facial muscles might be forever paralyzed, twisting your smile, weirdly distorting every expression. Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning. During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only. Micky wasn't surprised to find herself returning the wave. After a week with Geneva, she'd already. A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Sterm really is? Now, if we could prove all the incidents, all at the same lime-" was no absolute, top-down hierarchical structure at all. It was a microcosm of the whole planet, he was beginning to suspect. Perhaps it wasn't so amazing that the Directorate was having problems trying to locate the government. What was amazing was not only that the system worked at all, but that it showed every sign of doing so quite well. "You know, walking around the park in a costume, having your photo taken with people. I wanted to be strictly followed in all life-and-death matters. Because he had committed himself to healing Leilani one." Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents.
