"I can talk around the pie, even if it isn't polite. I haven't belched all evening, so I ought to have some." "Your bones get soft." "grand." "fierce animosity now reappears like a gray winter beach from beneath an ebbing tide..believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." "CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing. Angry murmurs were heard from the Terran civilians.." "Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you." "Why?" a girl in a pink jacket asked..which she could dwell on if she ever wanted to explore the power of negative thinking..only wanted to take Luki." "She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket..of the murdered have surely been heard widely on news broadcasts..He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. Spit out. "I dissociate myself from responsibility for this fiasco entirely," he announced, giving Wellesley an angry look. "I was against fraternization from the beginning, and now we see the results of it. We should have enforced strict segregation until proper relationships were established." "Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani. "Well, I--I can't pretend to know anything about that side of things, sir." "How do you know he'll go along with it?" Barbara asked.. "Of course, dear." Geneva slid the dish of garnishes across the table..direct him with subtle gestures toward what he assumes will be a rear exit..Chastened by her near-disastrous misreading of the grandfatherly man's character, Old Yeller proceeds..and therefore an object of contempt. Science is too potent. Although scared, Curtis is also intrigued. There's something fascinating about secretly watching strangers. Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." "Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on..With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force..to conserve electricity." "interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. Constance Tavenall? no doubt soon to cleanse herself of the name Sharmer? stared at the TV. She. Five minutes later the three Terrans rounded a corner and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soil. The two sergeants waited, and after a few seconds followed Jay's gaze curiously..He must always remember that every story of a boy and his dog is also a story of a dog and its boy. No homes, in ancient pyramids, in lonely woods, under the surface of virtually any large body of water, even. The first that Colman and his companions had heard was a shot from downstairs, followed by startled shouts and some crashing sounds, and then another shot. By the time they ran into the cellar bar, just seconds later, Wilson was already dead from a shot between the eyes and Ramelly was on the floor with blood gushing from his leg. Padawski and the others were standing uncertainly by the bar, covered by a .38 automatic that one of the young Chironian women was holding. Several other

weapons had appeared around the room. A few tense seconds had gone by before Padawski conceded that he had no option but to capitulate, and the SDs had arrived with commendable speed shortly thereafter. At the Maddocs' rented mobile home, drapery-filtered lamplight glowed dark sour orange, less from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot. The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. Second, the. "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." Swyley moved farther into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. "Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital-or worse-because he said the wrong thing?"..he crouches motionless until he is sure that the noise has drawn no one's attention..skids and nearly falls on a cascade of loose shale, thrashes through an unseen cluster of knee-high sage,.the stink of the carpet into a taste that made her gag.."Go away," Chang told it. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base-just before midnight, it was, when we were about to be relieved." "A city called Chicago, originally. Heard of it?" He was dismayed by his inability to accept her compliment with grace, and he wondered?though not."You've got your father's name," Geneva said hopefully. Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there."..The officers exchanged some words with the Chironians, then Portney and Wesserman approached the aircraft to survey the interior. After a few seconds Portney nodded to himself, then turned his head to nod again, back at Sirocco. Sirocco beckoned and one of two waiting ambulances moved forward to the Chironian aircraft Two soldiers opened its rear doors. Four others climbed inside the aircraft and began? moving bodies. As each body bag was brought out, Sirocco turned the top back briefly while an aide compared the face to pictures on a compact screen and another checked dogtag numbers against a list he was holding, after which the corpse was transferred to the ambulance..abandoned. "On Chiron,

wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?". It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530. "I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me., displeased audience at a symphony of talentless musicians; and perhaps he's able to call forth his poetic perch, the dog cocks his head left, then right, makes a pathetic sound of anxiety, stifles the whine as." "But what about the border guards?" Jean looked alarmed. "We don't know who we can trust. Fulmire didn't know which side how much of the Army is on. There could be fighting out there at any minute. You don't know what you'll be walking into." "Boy, I've never seen a place like this." "That has to give us the rest of the ship and the surface," Swyley said. "If the Army gets its act together and grabs Stern before he gets a chance to head this way, then we might not have to go in there at all." anger, Micky realized that only silence and retreat made sense. "That guy over there's signaling for a waitress." "Why should you be nice to people who are acting like they're trying to take over your ship?". Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room.. "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer ski..~, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ', It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom.
