But it did not lack for use. Productive work suffered as the five of them frantically ran through all the possible permutations of three women and two men. Animosities developed, flourished for a few hours, and dissolved in tearful reconciliations. Three ganged up on two, two on one, one declared war on all the other four. Ralston and Song announced an engagement, which lasted ten hours. Crawford nearly came to blows with Lang, aided by McKillian. And we can't remove ourselves from the pain. Ordinary readers can skip, or read every third word, or quit in the middle. We can't We must read carefully, with our sensitivities at full operation and our critical-historical apparatus always in high gear?or we may miss that subtle satire which disguises itself as clich?, that first novel whose beginning, alas, was never revised, that gem of a quiet story obscured in a loud, flashy collection, that experiment in form which could be mistaken for sloppiness, that appealing tale partly marred by (but also made possible by) naivete1, that complicated situation that only pays off near the end of the book. Such works exist but in order not to miss them, one must continually extend one's sensitivity, knowledge, and critical care to works that only abuse such faculties. The mental sensation is that of eating garbage, I assure you, and if critics* accumulated suffering did not find an outlet in the vigor of our language, I don't know what we would do. And it's the critics who care the most who suffer the most; irritation is a sign of betrayed love. As Shaw puts it: "Everyone is." Her voice was not bitter, but there was a flatness of tone that served as well.. "No! There's no other way. Oh, not people like us, maybe. Maybe we're seeing them right now, spinning like crazy." They all looked uneasily at the whirligigs. "But I think they're not here yet I think we're going to see, over the next few years, increasing complexity in these plants and animals as they build up a biome here and get ready for the builders. Think about it. When summer comes, the conditions will be very different. The atmosphere will be almost as dense as ours, with about the same partial pressure of oxygen. By then, thousands of years from now, these early forms will have vanished. These things are adapted for low pressure, no oxygen, scarce water. The later ones will be adapted to an environment much like ours. And that's when we'll see the makers, when the stage is properly set."
